

CAMPUS SAFETY

Please help us!

After school traffic around the **Junior-Senior High School** is congested from 3:00 to 3:15 pm. That's understandable considering 540 junior and senior high students are released from class and approximately 90 elementary students arrive by shuttle bus during that time period. Our campus traffic design works quite well and we appreciate your cooperation during our peak traffic.

We are asking parents to pick up students in the designated areas only – **main entrance or lower lot near the MPR**. Please do not pick up students in the middle parking lot. Waiting and picking up students in the middle parking lot mixes students with cars backing out of stalls and creates an unsafe situation.

Parking spaces become available in the lower lot first. When the pick up area is full, parents are welcome to enter the lower lot from NE 16th St. and find a parking space near the pick up zone. From there you can walk to find your student or make arrangements to have them wait for you on the stairs near the MPR. Please try to keep student foot traffic limited to the pick up zone.

Parents of elementary students are asked to remind their students to wait on the sidewalk in a safe area until it is safe to load your vehicle.

Parents of high school students are asked to remind their student drivers how important it is to drive slowly on campus. We all need to do our part!

Safety Tips:

- Use the inside (curb lane) lane to drop off and pick up
- Watch for young children
- Put your car in park when loading or unloading
